"Once a new technology rolls over you, if you're not part of the steamroller, you're part of the road."

SKILLS

DevOps	AWS · Kubernetes · Terraform · Docker · CI/CD · GCP
Programming	TypeScript · Go · Rust · Python
Backend	NestJS · Node.js · PostgreSQL · REST · WebSockets
Frontend	React · Next.js · Vite · TailwindCSS
Languages	German (Native) · English (Fluent)

EXPERIENCE

PCG GmbH

Remote, Germany

SENIOR SOFTWARE DEVELOPER

Jan 2023 – Present

- Technical lead for an in-progress customer data platform focused on self-service operations and support ticket reduction.
- Engineered complex cross-account AWS architecture with mirrored and cached statuses/security groups to reduce latency and avoid rate limiting.
- Led end-to-end delivery of a scalable B2C social platform for creator media management and distribution.
- Delivered monetization features including creator subscriptions and direct content purchases.
- Delivered a sustainability reporting product after stepping in mid-project, leading client communication and technical decision alignment.

Devoteam GmbH

Remote, Germany

CLOUD CONSULTANT

Jan 2022 – Jan 2023

- Built core microservice capabilities for a meter collection and analytics platform used by field employees.
- Enabled automated interpolation and dashboard visualization workflows for anomaly detection such as pipeline leaks.
- Served as cross-team liaison between frontend, backend, and data teams to resolve integration blockers and failing pipelines.

code'n'ground AG

Heidenheim, Germany

DUAL STUDENT

Jan 2020 – Jan 2022

- Led a digital health (DiGA) snoring-resolution application that generated dynamic daily training plans.
- Translated a complex medical algorithm into deterministic scheduling logic with conflict prevention and prerequisite-gated progression.
- Built a configurable psychological research assessment tool as solo developer for university-led emotion-recognition studies.
- Enabled configurable image timing, intervals, and audio cues with automated report generation, leading to a Phase 2 expansion.
- Introduced Angular as the company's first modern frontend stack and transitioned delivery away from legacy jQuery/CodeIgniter patterns.

- Led a waste disposal matching platform connecting companies with special disposal requirements (e.g. medical waste) to registered disposers.

code'n'ground AG

Heidenheim, Germany

BOOTCAMP

Jan 2019 – Jan 2020

- Rapidly upskilled in software engineering fundamentals during bootcamp and dual studies.
- Contributed foundational implementation work to a multi-tenant e-commerce shop, later taking full ownership of its ongoing maintenance.
- Contributed foundational implementation work to a planting machine configurator.

EDUCATION

DHBW Heidenheim

Heidenheim, Germany

B.SC. BUSINESS INFORMATICS

Oct 2019 – Oct 2022

Margarete Steiff Gymnasium

Giengen, Germany

ABITUR

Sep 2009 – Jun 2018
